🪪 Overview

Braxton Jones is a Full-stack Web Developer with knowledge in front-end and back-end technologies, bringing a comprehensive understanding to create seamless and dynamic web solutions.

📂 Technical Projects

Setlist - Spotify Playlist Sharing Service

- Engineered a playlist-sharing website utilizing Spotify's API, enabling users to seamlessly share their curated playlists.

- Designed the app for an engaging experience, focusing on intuitive navigation and a visually appealing user interface.

- Enhanced search functionality with genre, featured artist, and playlist purpose filters.

TextFlow - Markdown Editor ⧉

- Designed and constructed a markdown editor facilitating easy text formatting and editing.

- Integrated markdown language support to enhance content creation and styling.

- Implemented real-time preview features for improved user engagement.

PayTrak - Invoicing Web App ⧉

- Engineered a user-friendly invoice web app with streamlined billing processes.

- Implemented features for efficient invoicing, payment tracking, and financial reporting.

- Optimized user experience through responsive design and intuitive interface.

🧩 Skills

| CSS3 (Sass, CSS Modules) | Javascript (ES6+) | ReactJS | Responsive Web Design |

| Node.js | Express.js | MongoDB | PostgresSQL | Agile Methodology |

| Testing (Jest, Vitest) | Animation (GSAP, Framer Motion) |

🎓 Education

Scrimba Bootcamp   2022 – 2023
- Completed a full-stack web development program, gaining hands-on experience with popular frameworks and applying an Agile development approach for project execution.
